in LinkedIn

🏠 Leetcode

A full-stack web developer with a track record of delivering complex applications, seeking an internship.

## 🧠 Skills

- MERN
- TypescriptJS
- REST API
- GraphQL
- Web Hosting
- Material UI
- Firebase
- SQL
- Java
- Python
- C & C++
- Solidity
- Ethereum Blockchain

## 👛 Professional Experience

Software Developer, Controlytics Automation Pvt Ltd ✍ Hyderabad

- During a **four-month** internship, worked as a software developer and built an interface using **Thingsboard** that allows users to set temperature thresholds and view their current temperature, with an alarm triggered if the temperature exceeds the limit.
- Developed a **tracking device** that monitors the movement of vehicles in a specific area while keeping track of when and where they enter and exit.

## 📁 Projects

### Blog Application ✍

- Full-featured blog application with a powerful backend API, a dynamic frontend interface, and a scalable database that enables users to easily create and publish their own blog posts.
- Permits uploading of user content in MP3 or MP4 format.
- Provides the facility to manage comments, tags, and other aspects of their blog in real-time.

### Social Media App ✍

- Proposes setting up a public profile on a website and participating in social media exchanges.
- Allows the user to connect with friends and family, share photos, and stay up-to-date on current events.
- Users should be able to leave comments on this application, which allows them to like or dislike postings and follow or unfollow other users.

### Cloud Kitchen ✍

- Users can quickly order their favourite foods and have them delivered to their table.
- Presents customized suggestions and also has one of the best shopping-list features.
- Enables pickup or drive-through options and a payment interface.

## 🎓 Education

B.Tech, Government College of Technology  
Information Technology - CGPA: 8.5
